

It means the **world** to us

OccuMED – excellence beyond medical

At OccuMED we believe we must live our values of excellence, beyond the provision of medical services to our clients.

This pursuit of excellence lead us to ensuring that OccuMED and our supply chains provide safe working conditions where employees are treated with respect, and business operations are responsible and environmentally sustainable. We created our guiding ESG Policy and Environmental Management Strategy to ensure we deliver on this commitment.

OccuMED is committed to the highest standards of responsible and sustainable operation

We understand that the services we offer clients and the ethical standards we operate our business under impact beyond OccuMED and extend to the local communities in which we operate, as well as the broader economy and environment.

As part of our proactive and holistic approach to sustainability and to environmental, social and governance principles, we seek to work with clients, partners and suppliers who share this understanding and commitment.

Our key ESG initiatives are:

- OccuMED is WA's first Climate Active certified medical practice
- We implemented an extensive decarbonisation plan and undertake practices across the organisation such as;
 - energy reduction practices,
 - water use minimization and
 - waste management and recycling practices.
- OccuMED recruits fairly and openly for a diverse and inclusive staff mix
- We take Privacy and cyber-security seriously:
 - We only collect personal information where there is legitimate medical or business purposes, or where there is a legal requirement to do so.
 - We regularly undertake cyber-security testing and training to ensure the integrity and resilience of our proprietary health applications and systems.
